Task 1
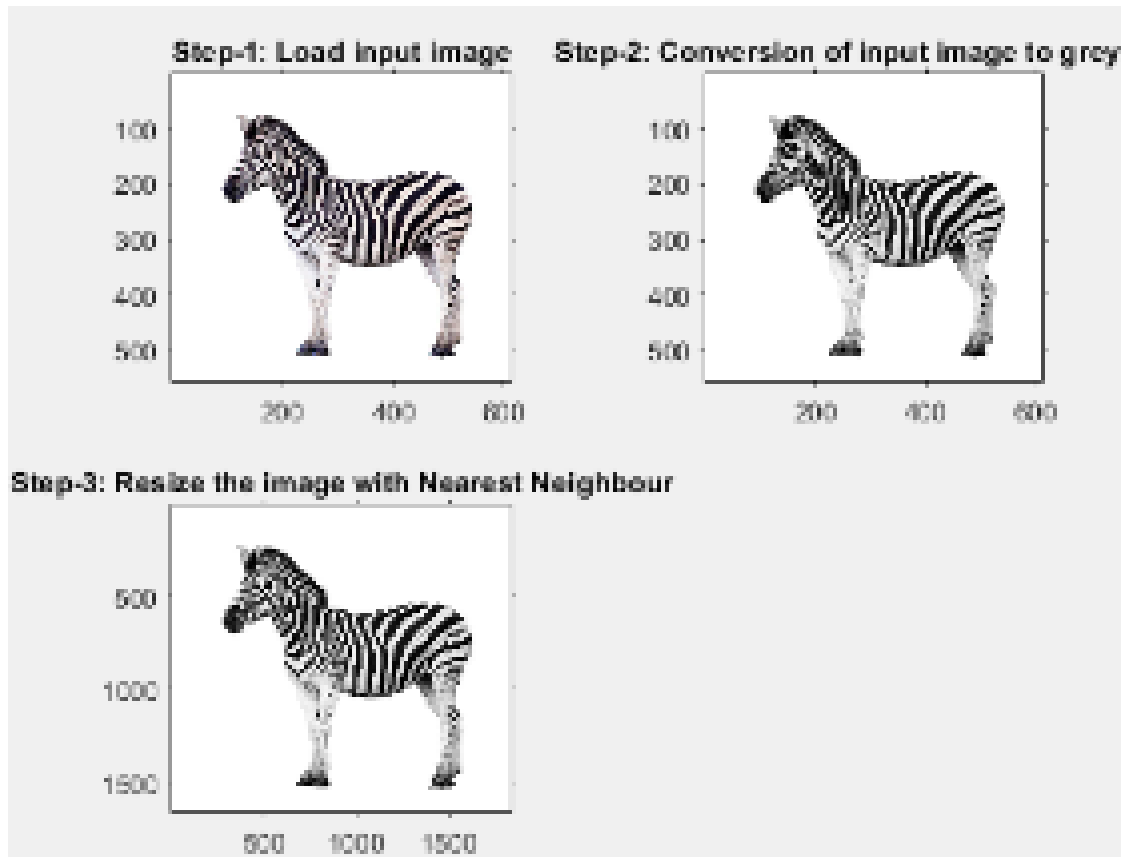

Task 2

Gray image

This is the original image, converted into grey scale

Mean image

This is the image once we have applied the mean filtering

Median image

This is the image once we have applied the median filtering

Task 3

This has 4 images. The first is the original image, no changes have been made. The second image is when the image has been grey scaled. The 3rd image is when the stars have been found dude to the boundary size and areas. The 4th image is when the grey image is made into black and white, and then everything but the stars are removed.

Task 4
